Answer Key

$A = \frac{1}{2}bh$ 2. $= \frac{1}{2}(4)(3)$ 2. $= 6$ ft². e. Area of garden $\approx 25.1 + 2(6) \approx 37$ ft². 31a. Areas of small rects. are ac , ad , bc , and bd . Sum of areas $= ac + ad + bc + bd$. This must be equal to $(a + b)(c + d)$, because sum of areas of 4 small rects. equals area of large rect.

~~Solutions Key 1 Foundations for Geometry~~

Also Hilbert's axiom II-4, is equivalent to theorem in neutral geometry that states that let $\triangle ABC$ be a triangle and let l be a line such that none of A , B and C lies on l . If l intersects AB then l also intersects either BC or AC . Step 5 of 5 Thus it shows that all the four

beginnings of geometry, exposing exactly what is assumed there, and building the entire subject on those foundations.

~~The Foundations of Geometry Second Edition~~
Foundations of geometry is the study of geometries as axiomatic systems. There are several sets of axioms which give rise to Euclidean geometry or to non-Euclidean geometries. These are fundamental to the study and of historical importance, but there are a great many modern geometries that are not Euclidean which can be studied from this viewpoint.

We know that in an isosceles triangle, the base angles are equal. This means we can form the equation: $x^\circ + x^\circ + 50^\circ = 180^\circ$.

$x^\circ + x^\circ + 50^\circ = 180^\circ$

$2x^\circ + 50^\circ = 180^\circ$

$2x^\circ = 180^\circ - 50^\circ$

$2x^\circ = 130^\circ$

$x^\circ = 65^\circ$
