SBR Product Information Super Barrier Rectifier: An Evolution In Power Rectifier Technology. A central component to a power circuit, or any type of circuit where a signal needs to be conditioned is a rectifying diode. Traditionally diodes from one of two families are used in these applications: the pn-junction diode and the Schottky Barrier diode. These technologies are well-established in circuit design and form the basis of most IC fabrication techniques.

## ~~SBR Product Information—Diodes Incorporated~~

Super Barrier Rectifier (SBR) is a proprietary and patented Diodes Inc technology that utilizes a MOS manufacturing process (traditional Schottky uses a bipolar process) to create a superior two terminal device that has a lower forward voltage (VF) than comparable Schottky diodes while possessing the thermally stable low forward voltage drop characteristics of a PN junction.
